

Customizable 2-Piece Gel Seat Pad

This unique 2-Piece Gel Seat Pad offers customer customization, for extra wide seats, at an economical price.

The green gel material may be wrapped around the edges of your seat, or may be cut to the size and shape of your seat using sharp scissors. It doesn't have to fit or cover your entire seat exactly for you to enjoy the pad. The center area is most important.

Custom sized Lycra covers may be ordered, or standard Lycra covers may also be used. We stock standard sizes of Lycra covers. 9", 11" 12" 13", 15", 17", and 18"

Installation Directions:

**If you are going to cut the gel to size or shape,
make sure to cut the gel before you remove the gel's plastic and paper wrapping.**

Remove the green gel material from the outer wrapping. It is very sticky, so be gentle and work in small sections at a time, peeling the wrapping from the gel.

Place the gel material on your seat, in one motion, centering the gel. If it's not in the best position for you, pull the material off and re-place. Do not try to slide the material on your seat.

Once the gel material is positioned correctly, turn the stretchy Lycra cover inside out.

Place the center of the cover in the center position, removing all wrinkles as you go.

Smooth and wrap the cover over the seat and gel working from the center toward the edges. If you have wrinkles, lift the Lycra material up and re-position. Do not try to slide the Lycra material on the sticky gel.

Once the cover is on and smooth, use the drawstring and cinch the very stretchy cover tightly over the entire seat.

The green gel material is safe to cut and handle, as it is made primarily from a Recyclable Mineral Oil. The Manufacturer states: "we have not received any reports of allergic reactions, sensitivity issues or health concerns since we began mixing it in 1984" FYI - Mineral oil is a common ingredient in baby lotions, cold creams, ointments and cosmetics. It is a lightweight inexpensive oil that is odorless and tasteless.
